

6370 ANGLE MOUNTING PLATE

ASSEMBLY INSTRUCTIONS

- 1.) Mount your StrongArm winch to the mounting plate with (3) $\frac{1}{2}$ " cap screws, lock washers, flat washers and nuts (not included). Position the winch so that the bolts are in the small part of the key-hole slots as shown before tightening nuts.

- 2.) Mount this assembly to your trailer bow stop as shown in drawing with the $\frac{1}{2}$ " U-bolt, nuts, washers and the $\frac{3}{8}$ " bolt, nut and washer provided.

The 6370 Angle Mounting Plate is designed for mounting StrongArm electric winches to trailer winch stands where insufficient room and improper angle are present.
