

6608 TONGUE JACK WHEEL LOCK

ASSEMBLY INSTRUCTIONS

Remove existing wheel bolt and nut. Place lock lever, ears out as shown, on new wheel bolt. Place lock bracket, tabs in, on wheel bolt. Align parts as shown in drawing and slip bolt through wheel bracket & wheel. Note that tabs on lock bracket must fit over edges of wheel bracket. Install new nut and tighten until downward motion with foot on "ON" side of lock lever locks wheel securely. With lock lever approximately horizontal, wheel should turn freely.

To lock wheel step down on "ON" side of lock lever. To release step on "OFF" side of lever.

⚠ WARNING! TRAILER WHEELS NEED TO BE BLOCKED WHEN TRAILER IS PARKED ON AN INCLINE.
